SUMMARY

The strategy-and-operations spine of a GTM org: a zero-to-one builder and one-to-100 scaler. As Databricks' first Partner Strategy & Ops hire, stood up the forecast, attribution, and first new-logo incentive programs from scratch, and ran annual planning across Sales, Finance, and Partner leadership: quotas, headcount, and coverage, top-down and bottoms-up. Runs the strategic initiatives that shape the partner book — which regional SIs to invest in, how partners are tiered — and writes the investment cases that fund them, presented at the most senior levels. Seven years of working relationships with GTM executives at Databricks, Salesforce, and CBRE — the access that gets the data in the room at all.

SKILLS

Operations & strategy — Operating cadence, annual & quota planning, OKRs, territory design, incentive/comp program design, revenue forecasting, executive & board reporting

Data & AI — SQL, Python (pandas), PySpark, Tableau, Salesforce, revenue attribution, deployed AI agents, AI enablement (Claude Code)

EXPERIENCE

Partner Strategy & Ops Manager · **Databricks** *promoted Feb 2023 · first Partner S&O hire* Aug 2021 – Present

- Built the partner team's revenue forecasting process from a blank page; its methodology and cadence remain the spine of the team's forecast years later.
- Designed the canonical partner attribution model — the single source of truth for how sourced, influenced, and attributed revenue is credited across both sides of the marketplace.
- Launched the partner org's incentive program tied to new-logo acquisition — crediting and payout logic designed end to end, still in force today.
- Diagnosed why partner leads were stalling, wrote the org's lead rules of engagement, and cut routing time from weeks to days.
- Led annual planning across Sales, Finance, and Partner leadership: quota-setting, headcount, and coverage design, top-down and bottoms-up.
- Wrote the investment cases behind new programs and presented them to senior GTM leadership.
- Shaped the partner program strategy — the Partner Value Score and tiering framework — earning global alignment and executive adoption.

SMB Sales Strategy & Operations Analyst · **Salesforce** Jul 2019 – Aug 2021

- Direct business partner to the \$250M AMER SMB Central business, advising AVPs, VPs, and RMs across the org.
- Built the territory-carving model (Python) that encoded the org's guiding principles — the basis of the annual GTM plan.
- Crafted the FY22 GTM guiding-principles analyses: customer continuity, account proximity, industry mix, top accounts, AE tenure.

Business Data Analyst · **CBRE** Sep 2018 – Jul 2019

- Owned the product-analytics stack end to end — data warehouse, Python data collection, and client-facing Tableau dashboards.
- Streamlined the product-analytics process: defined key metrics, the dataset, and the flow to visualization.

SELECTED PROJECT

Claude Code as an Operating System — running an AI-native operating cadence (public repo) —

github.com/dylan3796/anthropic-portfolio

- Built a working operating system for a function: big rocks as the planning pillars, skills as the repeatable plays, a metric dictionary as governance, and a retro loop that runs the QBR on the tooling itself.
- Headline workflow — commissions crediting: an agent codifies managers' plain-English coverage changes into effective-dated rules, and tested code, never a model, computes the money.

EDUCATION

University of California, Santa Barbara — B.A. Economics & Accounting · Dean's Honors
