

DYLAN RAM

GTM Data & Analytics · Revenue Analytics · AI-Augmented Reporting

916-690-5681 · dylanmr96@gmail.com · linkedin.com/in/dylanram · github.com/dylan3796/anthropic-portfolio

SUMMARY

Analytics leader who builds the data layer GTM organizations run on — attribution systems, governed company-wide datasets, and the executive reporting on top — then automates distribution with LLM agents. Seven years across Databricks, Salesforce, and CBRE spanning Spark and SQL pipelines, Tableau at scale, Salesforce analytics, and deployed AI reporting.

SKILLS

Analytics: SQL (window functions, subqueries), Python (pandas, NumPy), PySpark, Tableau (LODs, Set Actions, Prep), Salesforce & Einstein Analytics, Excel/GSheets

Governance & AI: Metric dictionaries, standardized datasets, golden tests, LLM workflow integration, Claude Code

EXPERIENCE

Partner Strategy & Ops Manager — Databricks (*promoted Feb 2023 · first Partner S&O hire*) Aug 2021 – Present

- Scaled partner attribution systems in Salesforce, SQL, and Spark to track bookings, consumption, and pipeline across a two-sided marketplace.
- Built standardized partner datasets adopted company-wide, powering 10+ executive and team dashboards.
- Designed the Partner Executive and Partner Scorecard dashboards — the single source of truth for Partner Sales and ecosystem health.
- Shaped the Partner Value Score — the composite metric behind the global partner tiering framework — earning executive adoption worldwide.
- Deployed AI reporting agents (Newsletter Agent, FAQ Agent) for automated Q&A, insights, and notifications — integrating LLM workflows into metric distribution.
- Led the annual quota-setting process, aligning Sales, Finance, and Partner leadership through top-down and bottoms-up planning.

SMB Sales Strategy & Operations Analyst — Salesforce Jul 2019 – Aug 2021

- Automated reporting and forecasting tools using Python, APIs, and G Suite — QBR decks, forecast accuracy, account/territory-specific data.
- Led the business unit's Tableau migration through enablement and establishing data governance; maintained and improved its dashboard estate.
- Developed a territory-carving Python script incorporating sales guiding principles, personnel, and accounts — the basis of the GTM plan.
- Crafted FY22 GTM analyses for the \$250M AMER SMB Central business: customer continuity, account proximity, industry mix, top accounts, AE tenure.

Business Data Analyst — CBRE Sep 2018 – Jul 2019

- Managed the product data warehouse with quarterly SQL updates; built Python web-scraping tools for component data collection.
- Partnered with clients on durable Tableau dashboards; spearheaded streamlining of product analytics — key metric definitions, dataset design, and the flow to visualization.

SELECTED PROJECT

Claude Code as an Operating System — public reference build for a partner-ops team (2026) —

github.com/dylan3796/anthropic-portfolio

- Built a governed analytics core for an agentic setup: one metric dictionary as single source of truth, session hooks injecting live scorecard data, and agent skills that read definitions instead of re-deriving them.
- Wrote a deterministic commissions-crediting engine with golden tests (mid-quarter hires, territory handoffs, split credit, coverage gaps); the LLM only authors rules — tested code computes every credited dollar.

EDUCATION

University of California, Santa Barbara — B.A. Economics & Accounting · Dean's Honors
