Strategy & Operations · GTM Planning · Partner Ecosystems

916-690-5681 · dylanmr96@gmail.com · linkedin.com/in/dylanram · github.com/dylan3796/anthropic-portfolio

SUMMARY

Strategy & operations leader with seven years as a direct business partner to GTM executives at Databricks, Salesforce, and CBRE. First Partner Strategy & Ops hire at Databricks: ran annual planning and quota-setting across Sales, Finance, and Partner leadership, shaped the tiering framework the global partner program runs on, and built the data foundation under all of it — then multiplied the team's capacity with AI reporting agents.

SKILLS

Planning & ops: Annual planning, quota setting, territory design, partner programs & tiering, executive reporting, QBRs

Technical: SQL, Python (pandas), PySpark, Salesforce, Tableau, Claude Code / LLM workflows

EXPERIENCE

Partner Strategy & Ops Manager — Databricks (*promoted Feb 2023 · first Partner S&O hire*) Aug 2021 – Present

- Led the annual quota-setting process, aligning Sales, Finance, and Partner leadership through top-down and bottoms-up planning.
- Shaped the Partner Value Score and partner tiering framework, earning global alignment and executive adoption.
- Designed the Partner Executive and Partner Scorecard dashboards — the single source of truth executives use to run Partner Sales and ecosystem health.
- Built standardized partner datasets adopted company-wide (powering 10+ executive and team dashboards) and scaled the attribution systems tracking bookings, consumption, and pipeline across a two-sided marketplace.
- Deployed AI reporting agents (Newsletter Agent, FAQ Agent) for automated Q&A, insights, and notifications, integrating LLM workflows into metric distribution.

SMB Sales Strategy & Operations Analyst — Salesforce Jul 2019 – Aug 2021

- Acted as direct business partner to the \$250M AMER SMB Central business, providing guidance to AVPs, VPs, and RMs across the org.
- Crafted the FY22 GTM guiding-principles analyses — customer continuity, account proximity, industry mix, top accounts, top cities, AE tenure.
- Developed the territory-carving Python script that encoded sales guiding principles, personnel, and accounts — the basis of the GTM plan.
- Automated QBR decks, forecast-accuracy tracking, and territory reporting with Python and APIs; led the unit's Tableau migration with enablement and data governance.

Business Data Analyst — CBRE Sep 2018 – Jul 2019

- Owned the product analytics stack end to end — data warehouse management, Python data collection, and client-facing Tableau dashboards.
- Spearheaded streamlining of the product analytics process — defining key metrics, the dataset, and the flow to visualization.

SELECTED PROJECT

Claude Code as an Operating System — public reference build for a partner-ops team (2026) —

github.com/dylan3796/anthropic-portfolio

- Built a working demonstration of running Claude Code as a team operating system: persistent memory, live-data session hooks, long-horizon plans tied to strategic initiatives, invocable skills, and a self-improvement loop.
- Headline workflow: commissions crediting where an agent codifies managers' plain-English coverage changes into effective-dated rules — and tested code, never a model, computes the money.

EDUCATION

University of California, Santa Barbara — B.A. Economics & Accounting · Dean's Honors
